

CATALYSING THE LOW-CARBON TRANSITION

Ecofys, a Navigant company, helps design, access financing and implement effective strategies and policies that catalyse a resilient, low-carbon future.

State and Trends of Carbon Pricing

Ecofys is developing the annual flagship “State and Trends of Carbon Pricing” report with the World Bank for the fifth year in a row. The report provides an up-to-date overview of existing and emerging carbon pricing instruments around the world and gives insights into trends and future developments. Carbon Pricing Watch 2017, the mid-year update, is launched at Innovate4Climate. <http://bit.ly/stcpecofys>

Carbon Pricing Unlocked

Carbon Pricing Unlocked, a partnership between Ecofys and The Generation Foundation, investigates how carbon pricing can facilitate sustainable global economic growth. The research tackles carbon pricing from a new angle, exploring its role along value chains up to the end consumer. The team published its first results during COP22. New findings on internal carbon pricing and carbon pricing revenues will be launched at this year’s COP23 in Bonn. <http://bit.ly/cpunlocked>

Partnership for Market Readiness

For the Partnership for Market Readiness (PMR), Ecofys investigates how to develop baselines consistent with rules that may arise for international crediting under the Paris Agreement. Together with SEI, Infras and Carbon Limits, Ecofys prepares a technical note which explores whether and how NDCs should be reflected in such baselines.

Mitigation Momentum

In this collaboration with ECN, supported by the International Climate Initiative (IKI), Ecofys helps Nationally Appropriate Mitigation Actions (NAMAs) become a reality. The team assisted governments to develop NAMAs in seven partner countries and now facilitates their financing. Ecofys also publishes the Annual Status Report on NAMAs and research papers on NAMA finance.

NAMA Facility support

Ecofys, together with its local partner Alcor, supported one of the seven NAMAs that was pre-selected by the NAMA Facility in its last call for projects. The selected NAMA aims to increase the uptake of energy efficiency and renewable energy measures across the building sector in Tunisia.

Financing NAMAs in Mediterranean countries

For the European Investment Bank (EIB) and the EU Energy Initiative Partnership Dialogue Facility (EUEI PDF), Ecofys is analysing the potential of NAMAs in Mediterranean countries to become bankable projects. Ecofys screens existing NAMAs and gives recommendations on how the EIB and other international financial institutions could support and finance NAMAs to achieve higher levels of implementation.

A 1.5°C strategy for FMO

In response to calls for an emissions-free economy, financial institutions have stepped up actions to address climate change in their portfolios. Ecofys supports the Netherlands Development Finance Company (FMO) in elaborating on a strategy to align its financial portfolio with the objective of the Paris Agreement to pursue efforts to limit global warming to 1.5°C.

Carbon risks of the economy, “Carbon Bubble”

Ecofys leads a project consortium that will analyse and evaluate the risk of a “carbon bubble” in the German financial system. The team will assess carbon risks in the German economy, conduct a carbon stress test for German financial institutions, and develop regulatory instruments to mitigate carbon risks in financial markets.

UNEP Inquiry “Design of a sustainable financial system”

Ecofys is preparing a report for the UNEP Inquiry on measuring progress in aligning the financial systems with sustainable development outcomes. The framework contains 24 indicators covering financial system governance, market behaviour and sustainable financial flows.

Tracking corporate climate performance

Ecofys supported the development of a methodology and tool for the Science Based Targets initiative. With our tool, companies are able to set GHG emission reduction targets in line with climate science since the methodology looks at sector-specific decarbonisation pathways. <http://bit.ly/17S2fwT>

Climate Action Tracker

The Climate Action Tracker (CAT), a consortium of Ecofys, Climate Analytics, and NewClimate Institute, has been tracking countries' climate action since 2009. CAT tracks emissions reduction pledges and policies for over 30 countries. As well as rating each country's (I)NDC using different effort sharing approaches, CAT estimates the impact of INDCs on global temperature. climateactiontracker.org

The Energy Report

The Energy Report presents a possible transition to a global, sustainable energy system. The two-part report contains a detailed analysis and scenario created by Ecofys, and a narrative by WWF. It addresses the fundamental question: “Is a fully sustainable global energy system possible by 2050?” <http://bit.ly/EcofysTER>

Market Based Instruments in Turkey

As part of the World Bank's Partnership for Market Readiness program, Ecofys is supporting Turkey's Ministry of Environment and Urbanization with an assessment of market based policy options, which could be used alongside an Emissions Trading System to tackle emissions from different sectors of the economy. <http://bit.ly/2q5KxTn>

Ecofys, a Navigant company, is a leading international energy and climate consultancy focused on sustainable energy for everyone. Founded in 1984, the company is a trusted advisor to governments, corporations, NGOs, and energy providers worldwide. The team delivers powerful results in the energy and climate transition sectors. Working across the entire energy value chain, Ecofys develops innovative solutions and strategies to support its clients in enabling the energy transition and working through the challenges of climate change.
